

Expert On-Demand

Tableau Expert On-Demand is a phone and web-based service that offers fast access to expert consultants to provide post-go-live consultation.

Our Data Meaning consultants are available to answer questions, provide guidance, and transfer best practices knowledge.

All members of this team have specific field experience with software and Software-as-a-Service (SaaS) providers.

Ideal for:

Tableau

- Connect and visualize your data in minutes
- Analyze data with intuitive drag & drop products
- Quickly build powerful calculations from existing data
- Automatic analytic workflows in Tableau Prep

To qualify for a position on the team, consultants must demonstrate expertise in putting sophisticated applications into production, worked on a minimum of five prior Expert-On-Demand engagements, and have undergone extensive training in Tableau and complementary software solutions and application architecture design. You can benefit from our knowledge with best practices solutions to complement your development efforts as questions arise.

Expert On-Demand will help your team navigate and leverage product functionality to achieve your specific goals. It begins with a brief discovery WebEx meeting to review your requirements, scope, and constraints to ensure your success with the specific products you are using. Expert On-Demand is available most days from 9:00am – 6:00pm EST. You will be assigned a primary point of contact, and either that individual or their back-up will provide you with assistance on an as-needed basis.
